Suggestions for Using Fertilizers

For all small crops, use 1000 lbs. per acre, broadcasting it over the field before harrowing; the process of harrowing will work the fertilizer into the ground to a sufficient depth.

For Corn and Cabbage crops, when planted by machine with fertilizer attachment, use about 500 lbs. per acre.

In case of doubt as to what kind of fertilizer to use, drop us a line, stating what kind of soil, what product you want to grow, also what was raised the year before. Our experience may help you to produce better and bigger crops. All inquiries promptly answered.

John Deere Implements

The superiority of the John Deere Plows is so well known among gardeners that we think it is unnecessary to describe their merits.

Through personal contact with truck gardeners, we have learned that the following models are liked best and used most.

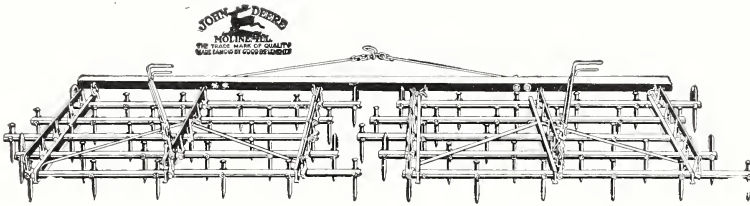

John Deere Stubble Plow. Steel beam, 14-inch share.

John Deere Half Breaker or General Purpose Plow. Steel beam, 14-inch share.

We aim to have these models on hand at all times.

We carry in stock, the year around, repairs for these plows, also for older models, such as plow shares, landside plates, landside bars, adjustable heels and cross clevises. Bring in your old part or give us the number stamped on the back thereof.

We cannot furnish Wood Beam Plows, as the maker has discontinued them.

Ajax Special Lever Harrow

In Harrows, we recommend the Ajax Special Lever Harrow as the most suitable. It comes in two sections, with a drawbar or evener, has 30 teeth to each section and three rocker arms on top of each section, thus giving it extra strength.

Harrow repairs on hand include spike teeth, clamps, bolts and eveners. Other parts can be furnished on short notice.

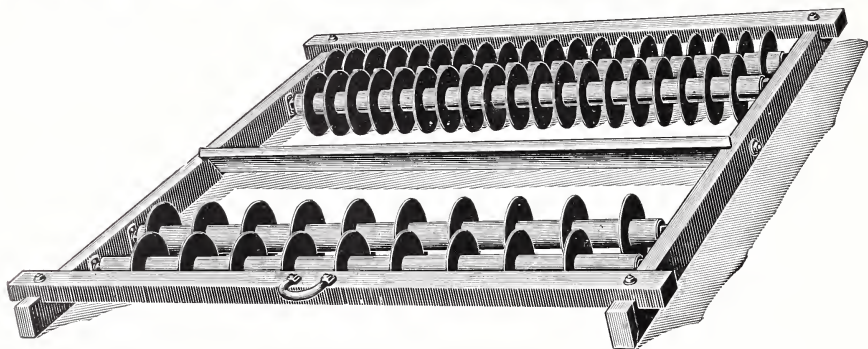

John Deere Two-Horse Corn Planter with or without Fertilizer attachment.

John Deere Mowers, 4½, 5, 6, or 7 ft. cut.

Disk Harrows with tongue truck or with pole; 4 to 10 ft. cut.

John Deere Riding Cultivators, 6 or 8 shovels.

MEEKER HARROWS

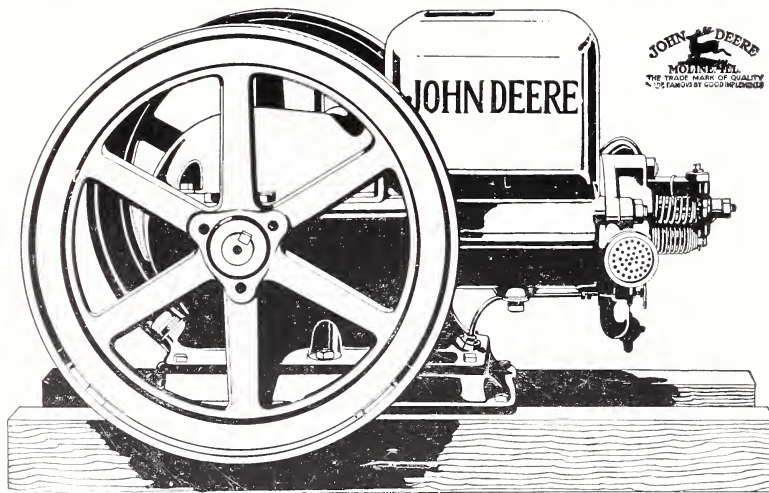

The money spent in the purchase of a Meeker Harrow is an investment never regretted; saves a lot of labor and gives the seed a better chance to come up evenly; prepares the seed bed more perfectly than any other tool we know of.

They are made in the following sizes:

4 feet 6 inches	by 4 feet,	with 46	8-inch discs.
6 feet 8 inches	by 6 feet,	with 58	8-inch discs.
6 feet 8 inches	by 6 feet,	with 58	10-inch discs.
8 feet	by 6 feet,	with 82	8-inch discs.
8 feet	by 6 feet,	with 82	10-inch discs.

Prices furnished on application.

John Deere Gasoline Engines

The important operating parts on this engine are entirely enclosed. There is nothing that requires watching or adjusting. Even the mixer or ignition system requires no adjustment. Close the air shutter, crank the flywheel, and away it goes to relieve every one in the family of muscle-taking, time-consuming jobs. Pumping water, washing clothes or vegetables, operating the corn sheller, feed grinder—these are only a few of the jobs this engine will do.

Everyone will appreciate the safety of this engine. There are no projecting shafts or exposed gears on which clothing can be caught. It is a clean engine because no oil or grease can be spilled out. These advantages the women folks will appreciate.

Price: 1½ H. P., \$62.50; 3 H. P., \$100.00.
